*Academic supervisor:*

**Annotation:** *Good pronunciation of English is a goal and the only result for any language learner. In addition, it is an excellent indicator of the level of knowledge of the language. Therefore, the skill of correct pronunciation should be given a lot of time and patience. But first you need to collect the necessary knowledge.*

**Keywords:** *As for English, organs such as the tongue, lips, palate, alveoli (the most sounds are formed with them) are actively involved in its creation.*

## INTRODUCTION

Learning English in today's globalized world is an academic success, professional it has become a necessity for development and effective communication. The most used in the world as one of the languages, English provides a wide range of opportunities for people in various fields. However, excellent mastery of this language effective learning strategies, correct teaching approach and requires the integration of modern technologies. This article covers English the most effective methods of learning and its main benefits are highlighted. Language acquisition the role of technology in the process, including online platforms, mobile applications and virtual education the use of tools will be discussed. Also in the article, the teacher told the students that the role in guiding and motivating them is analyzed. In addition, four practical on the development of basic language skills – Speaking, Listening, Reading and writing methods are described. Finally, English General benefits and motivation<sup>1</sup> of learning English. Professional and academic opportunities: the study of the English language of a student gives access to professions that are in high demand in the international labor market. For example, the possibility of working in global companies and mainly foreign organizations require English to get a job. Opportunities for professional development and cooperation. With foreign specialists, it will be easier to communicate, exchange experiences with the group, and working in cooperation will make this language benefits learning. Collaborative learning (hereinafter CL-Cooperative Learning deb maintained) is the teaching that students are encouraged to work on academic tasks defined as a set of methods. It is also students in a specific activity work in groups and maximize each other's learning process as well as is a teaching technique used to achieve certain goals. The importance of motivation in learning this language: in the process of learning the word, the reader has a personal interest in pleasure and mastery of the language. The feeling of being able to successfully pass exams in relation to oneself, etc. The correct use and useful aspects of the internet in the study of the language, when it comes to internet, we mainly

understand popular media (social media, various platforms, applications, etc.) and this network is very important for us in the study of the language necessary. Because we mainly use online courses and platforms in learning English we use; independent learning through sites such as Duolingo, BBC learning English, for example can. You tube and the use of podcasts: from renowned teachers and language professionals watch his lessons for free that is, I am mainly Lingua Barno, Teacher Azam, Liz and other I try to learn the lessons of teachers. In the process of learning from the internet use as an additional tool students' learning intention. Useful aspects of language learning through the Internet: a free and accessible education is possible, that is, there is an opportunity to learn at any time and place. Also in terms of cost there is efficiency, for example due to the presence of many free resources that require additional cost will not be done and there are other useful aspects. The role of the teacher in learning English is that the teacher is not only a cognitive giver, but also a guide, motivator, and a person who helps students develop their language skills effectively.

The teacher must identify students' needs and learning styles and apply appropriate methods. While some students learn better through grammar-based exercises, others better language by animating interactive activities, discussions and life situations will. Effective learning of a foreign language is closely related to memory. Hence, success of language materials that the teacher has mastered to students he needs to know how to help with storage. Further psychological research is important here is significant. For example, psychologist P.K. Zinchenko is voluntary in the learning process and which proved that involuntary memory was of great importance. P.K. Zinchenko involuntarily in the process of studying memory, it was concluded that this type of memory has its own significance has. Therefore, creating favorable conditions for involuntary memorization in teaching a foreign language must the teacher's education is based in birnechtasinyunited.

1. As a teacher manager – the teacher plans classes, the progress of students watch boradivasin vaqtinisamaraling.

2. As a teacher facilitator (facilitating the learning process – - teacher helps to overcome the difficulties that students face in the learning process and shuorqalitilorganiosonizes.

3. Teacher as a resource – within the framework of this role, the teacher is less guided and students take independent initiative and receive advice and guidance from the teacher. This the teacher will always be able to answer students' questions and help them requires to be ready

The four basic skills of the English method that method is mainly studied in speaking, writing, listening and reading skills.

1. Speak (Speaking)
